**THE PUGET SOUND PIPE CO.**  
OLYMPIA, W. T.

Sole Proprietors and Exclusive Manufacturers of  
**Horton's Water Pipe and Couplings.**

These pipes are suitable for either water, oil or gas and are made to sustain a pressure of 200 pounds to the square inch, or a gravity head of over 50 feet. Water can be brought from any elevation in them without leak or waste. The tube is made of the best Puget Sound pipe which, being thoroughly seasoned, is spirally bored with strong iron bands of suitable strength for any required pressure. The whole exterior is then given a coat of asphaltum, which protects the iron from rust and the wood from insects or decay. The pipe is made in 12 feet lengths and spirally banded and connected with iron couplings. We manufacture this pipe in all sizes from 1 to 12 inches. The section of the water makes it perfectly water tight in a few hours. In point of durability this pipe exceeds all others. The asphaltum coating ahead of a thorough and almost everlasting protection to the iron from rusting and decay while the wood being constantly saturated with water, will last for generations. It can be laid for from 1 to 4 cents per foot, according to size. It is from 1/4 to 1/2 the cost of iron and is equal in all respects to the very best standard iron pipe now in use. It will never corrode or give the water a bad taste, as is the case with iron; is less liable to freeze, and can be sent to distant points at 1/4 the cost. City or town corporations, or any others contemplating a system of water supply will find it greatly to their advantage to consult us for further information. All work guaranteed. Send for prices and quotations. Address—
